Guide to setup i-device with Radwin Island

This guide is for use with iPhone 4 or 4S and iPod Touch 4th generation. Make sure that your device and computer are connected to the same WiFi network during the setup.

1. **Install Control** app on your device from App Store.

2. **Launch Control** app on your device. You should now be in the **Interfaces** tab, here click on the little **+** in the top right corner. Here you write **http://dl.dropbox.com/u/11182094/unitycontrol.js** and press **submit**. In the Interfaces tab you should now see **Unity Controller** in the bottom of the list.

3. Now go to the **Destinations** tab. Here you press the little **+** in the top right corner, and enter the **IP Address** of your computer. (If you don't know the IP of your computer you can **Launch Radwin Island**, and from the Main Menu go **Options > Toggle iPod**, the Options menu will expand and you will find one called **Get your IP address**.) Just leave Port at 10000. When you have entered the address, press **Add** and your IP should appear in the bottom of the list.

4. **Select** your destination to be your **IP** by tabbing your IP from the list under Destinations.

5. **Go** to **Interfaces** tab and select **Unity Controller**

6. In Unity Controller you **press Start** which is found in the almost bottom of the screen.

7. Now you should be able to **start Radwin Island** go **Options > Toggle** iPod, and then **start the game**. The start button in Unity Controller should now write **Connected**.

Enjoy

Known issues

We have experienced issues that device and computer won't connect. A solution to this problem is:

1. Shut down the game and the Control app (Control app is shut down by double tabbing home button on iDevice. If accessibility is on: find Control on list double tab on it holding the second tab for 3 seconds, the double tab Control to shut down. If accessibility is turned off: press and hold on Control tab and press the (-) sign by it when it appears)

2. Start up Control select destination (if you cannot see your already entered IP address press refresh in the top right just left of the + button). Go interfaces and select Unity Controller and press start

3. Now launch Radwin Island and it should be connected
